

SITE MAINTENANCE MONTHLY PROGRAM

CMBS Global also offers a monthly site maintenance program for WordPress sites and includes the following monthly services:

- Site and Database Backups
- Regular updates to all themes, plugins, and software
- Ensuring that WordPress is always up to date
- Virus Scanning (etc.).

Should the site be hacked or somehow brought down by something regular maintenance should prevent... any work necessary for getting it back online is at no additional expense. *Does not include those things outside of our control like your hosting server going down (for example).*

Note: this does not include page updates or edits as this is solely site maintenance.

Complimentary Premium Plugins included for as long as you are under the CMBSG maintenance program are as follows: Setup & Configuration of: Backup Buddy, Security Pro (if applicable)

ONE-TIME SET UP FEE: The prepaid, one-time setup fee of \$150/per site requires payment to be made up-front at the time service is contracted.

MONTHLY SERVICE FEE: Prepaid monthly. The initial fee is invoiced on the 1st of the month following the month you contract this service with us (**or beginning month 2** of your service contract).

COST OF THE MAINTENANCE PROGRAM: Our low maintenance fee of \$65/month is discounted even more when 2 or more sites are involved.

THE NEXT STEP

Monthly website maintenance is crucial for conducting business online – no matter the size of your business.
